

Metro Dyslexia Support Group

'Making Your Own Success'

Nick Larcombe

Co-founder 'Ripple Aerospace'
Bachelor of Science (B.S.), Major Aviation
Dyslexic Learner

As a co-founder of Ripple Aerospace, a rocket startup, Nick is working towards a world with more spaceships than sea ships.

While not claiming to have cheated the education system, he does however admit he did not follow the standard path. Thankfully the tools of the modern age filled in the gaps.

He grew up and went to school in a country W.A., moved to Perth for University and now he can be found in locations of future rocket launches.

Join us as we hear a first hand account of Nick's experience of navigating the education system until his current job of navigating solar systems and how he managed, facing challenges as well as keeping his eye on his goals and dreams.

***Current Year 11 and 12 students are welcome to this meeting.**

Wednesday 7th March, 2018

7pm - 8:30pm
